

TORNADO DRILL PROCEDURES

One of the most serious moments in a school day is when the tornado horn is sounded. It is at this time when lives may be in serious danger due to a tornado or some other disaster. It is at this time that every student and every staff member must be absolutely alert, cooperative and obedient to the prescribed procedure. Lives may be in danger and every precaution should be taken to protect them.

Periodically during the school year evacuation drills will be held in accordance with the procedures outlined in the Parkview School District Emergency Preparedness Plan.
