

COOPERATIVE EDUCATION PROGRAMS

The District may participate in selected programs and services offered by Cooperative Educational Service Agency 2 (CESA #2) or other regional CESA, whenever it finds such offerings desirable and cost-efficient. Programs and services that may be considered would logically include those which serve a small percentage of the District's students or those which would be prohibitively expensive if implemented locally.

Programs and services for individual students with exceptional educational needs may be provided through the CESA.

CESA offerings shall be considered individually by the Board with input from the administrative staff.
