### **New Math Curriculum at Parkview Elementary**

Beginning this fall, students at Parkview Elementary will use Bridges in Mathematics second edition, a comprehensive curriculum for grades K–5. Bridges is a rigorous program designed to address the new math standards in a way that’s enjoyable and accessible to all learners.

The curriculum focuses on developing in students a deep understanding of math concepts, proficiency with key skills, and the ability to solve new and complex problems. Learning activities tap into the intelligence and strengths all students have by presenting mathematically powerful material alive with language, pictures, and movement.

Students in a Bridges classroom talk about math, describe observations, explain methods, and ask questions. They are encouraged to find multiple ways to solve problems and show different ways of thinking. This is a vital way to help students build more flexible and efficient ways to solve increasingly complex problems. Hands-on activities engage them in exploring, developing, testing, discussing, and applying mathematical concepts.

Teachers have been trained and have had time to plan and prepare for the implementation. For more information, go to [mathlearningcenter.org/families](http://mathlearningcenter.org/families) or speak with your child's teacher. Look for an article in the October Voice for a more in depth look at how staff and students at PES are using our new materials.
