

EMERGENCY PLANS

The Board recognizes its responsibility to provide facilities, equipment, and training necessary to minimize the effects of disasters. It is the responsibility of the administration to develop a school disaster plan which will serve as an educational tool and an emergency measure. The school disaster plan should provide as much protection as possible for children while at school and on their way to and from school, and should provide adequate instruction so that the school emergency plan may be carried out with the greatest possible speed and safety.

The district administrator, or designee, shall be directed to develop emergency plans for evacuating the buildings during fire and other emergencies and for using the buildings for shelter in the safest manner possible during extremely inclement weather.

The Board believes that the safety of the students, staff, parents and community members is one of their primary concerns. In cases where severe weather warnings have been issued, the building administration will direct all students, staff, parents and community members within the building to shelter in designated shelter areas until the warning has been lifted or expired.

Drills shall be held on a regular basis which reflect current emergency plan.
